The second mode allows a differentiated colorization of each item of the considered level, using a list of unique colors

The screenshot displays the 3D software interface with the following components:

- Step manager:** Shows a workflow with steps:
 - 4 - Points, Fichier XYB (sample_cloud.xyb)
 - Result
 - 5 - Segment scene in horizontal slices
 - Sliced scene
- Model manager:** Shows a 'Sliced scene (5)' with a tree structure. A context menu is open for the 'Points of slice' item, with 'Automatic color (color gradient)' highlighted.

Name	1	2	3	Type
Sliced scene				
rootslice	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Std group
slice	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Std group
Points of slice	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Point cluster
- Item configurator:** Shows a table for 'Point cluster' with columns 'Name' and 'Value'.

Name	Value
1 Points	<input checked="" type="checkbox"/> Activate
2 Bounding Shape	<input type="checkbox"/> Activate
3 Bounding Shape center	<input type="checkbox"/> Activate
4 Barycenter	<input type="checkbox"/> Activate
5 Polyline	<input type="checkbox"/> Activate

The main 3D view shows a point cloud of a tree structure. The text 'The third mode each item of the gradient' is overlaid on the 3D view.

The screenshot shows a 3D software interface. At the top, there's a title bar 'Document 3' and a toolbar with various icons for selection, zoom, and other 3D operations. Below the toolbar, there's a row of buttons: 'Sync', a camera icon, an eye icon, a camera icon, a selection icon, a grid icon, a selection icon, a selection icon, and a selection icon. Below this row, there's a row of radio buttons: 'Items' (selected), 'Points', 'Faces', and 'Edges'. On the left side, there's a vertical toolbar with a list of items: 1, 2, 3. Item 1 is highlighted with a red box. The main view area shows a 3D point cloud of a forest scene with a ground plane. The point cloud is rendered in a dark color, and the ground plane is a light gray. The interface is in a dark theme.

In the case of "cluster of points" item type, it's possible, for example, to activate the display of the bounding box

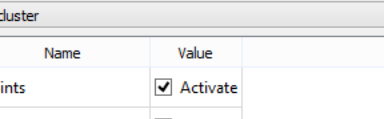

The screenshot shows the 'Step manager' window with a 'Debug' button in the top right. The main area lists steps in a workflow:

- Steps workflow
 - 4 - Points, Fichier XYB (sample_cloud.xyb) (selected, green checkmark, sphere icon)
 - ☐ Result
 - 5 - Segment scene in horizontal slices (selected, green checkmark, sphere icon)
 - ☒ Sliced scene

The screenshot shows the 'Model manager' window with a tree view of scene elements. The tree structure is as follows:

- Sliced scene (5)
 - rootslice
 - slice
 - Points of slice (selected)

The 'Points of slice' element is highlighted, and its 'Type' is 'Point cluster'. The 'Type' column for 'Points of slice' has a checkmark, indicating it is the active selection.

Apply ☒ Auto

A screenshot of a 3D software interface, likely Blender, showing a wireframe model of a building with trees inside. The interface includes a top menu bar with 'Document 3', a toolbar with various icons, and a selection mode dropdown set to 'Items'. The model is rendered in a wireframe style, showing the internal structure of the building and the trees. The trees are positioned within the building's volume, and the building's walls and floor are visible as wireframes. The background is black, and the overall scene is rendered in a high-contrast, wireframe style.

The screenshot shows a software interface for a 3D model. At the top, there's a title bar that says "Document 1". Below it is a toolbar with various icons for different functions: selection (mouse cursor, lasso, pan), manipulation (move, rotate, scale), and other tools like a camera, a light, a grid, a wireframe toggle, a settings gear, a save icon, and a refresh icon. Below the toolbar, there are four radio buttons labeled "Items", "Points", "Faces", and "Edges", with "Items" being the selected option. The main area of the interface is a dark gray workspace where a 3D model would be displayed.
